- User Research & Stakeholder Interviews
- Curriculum & Training Design (Virtual & Classroom)
- Storyboarding & Learning Prototyping
- User Flows & Learner Journey Mapping
- User research and interviews
- Animation and Interaction Design
- Video editing & production
- Wireframing and Prototyping

SUMANJIT SINGH

LEARNING EXPERIENCE DESIGNER |
DIGITAL LEARNING & SYSTEMS

PROFESSIONAL SUMMARY

Learning Experience Designer with experience designing and enhancing digital learning across higher education and school sectors. Skilled in applying instructional design principles to develop aligned curriculum, authentic assessments and engaging online experiences. Experienced in collaborating with academics and SMEs to translate complex content into clear, interactive learning supported by multimedia, LMS configuration and analytics. Strong focus on accessibility, inclusive design and continuous improvement to drive measurable gains in student engagement and course quality.

WORK EXPERIENCE

Padua College | eLearning & Technical Officer
February 2025 - Present

- Design, develop and maintain digital learning content and LMS resources for staff and students, supporting effective blended delivery.
- Conduct UX reviews of staff-facing eLearning materials to improve usability, accessibility and overall learning experience.
- Lead the generation and coordination of PTI (Parent-Teacher Interview) schedules and Mid-Semester Reports in collaboration with academic teams.
- Streamlined LMS support systems by developing structured guides, training videos and workflow improvements—reducing teacher support tickets by 40% and resolving 92% of issues within 24 hours.
- Deliver one-on-one and group training sessions to build staff capability in digital tools, LMS navigation and eLearning best practice.
- Support integration, testing and documentation of third-party digital tools, maintaining user guides and knowledge base resources.
- Assist with data analytics and reporting to monitor student engagement and platform usage trends.
- **Key Achievement:** Short course design for Year 7 - Year 10 students for Social Media Awareness in Moodle

Digital Business Solutions Specialist
Freelance | Apr 2024 – Jan 2025

- Designed, developed, and managed websites using CMS platforms (WordPress, Shopify, Wix) to enhance business presence.
- Created branding materials, including logo design, brochures, business cards and other print assets.
- Set up and optimized MYOB software, office tech systems and cloud-based collaboration tools for business efficiency.
- Provided IT consulting, troubleshooting and workflow automation to streamline operations.
- Implemented digital strategies including UX/UI improvements and online marketing to drive business growth

Learning Analytics & Reporting

- LMS Engagement Analytics
- Google Analytics
- Data-informed Design Improvements

UX / Prototyping

- Figma
- Adobe XD
- Miro

Multimedia Production

- Adobe Creative Suite
- Camtasia
- DaVinci Resolve
- Adobe Premiere Pro

Audio Production

- Adobe Audition
- Audacity
- Reaper

Web & Interactive

- HTML & CSS
- WordPress

Project & Collaboration Tools

- Asana
- Microsoft Teams
- Zoom
- SharePoint
- Freshdesk
- Jira

Learning Experience Designer

Monash College | August 2023 - March 2024 | Melbourne, Australia

- Developed and launched five self-paced Moodle modules using STACK and LaTeX, achieving an average 85 % learner completion rate and cutting assessment errors by 30 %.
- Contributed to the planning, developing & implement to the strategic Passport to Maths Project which helps to identify students facing difficulty in maths and suggest the right course.
- Creating multimedia content such as graphics, presentation, motion graphics etc. for the internal projects at Monash College.
- Lead video production for teaching content by liaising with SME's for scheduling shoots for the Passport to Maths project.
- **Key Achievement:** Spearheaded the Passport to Maths initiative, significantly increasing student engagement and diagnostic assessment completion rates

Learning Designer & Support Officer

Victoria University | August 2021 - August 2023 | Melbourne, Australia

- Designed and developed blended and online learning content and assessments in D2L Brightspace, aligned with the VU Block Model and institutional standards.
- Partnered with academics to structure units, scaffold learning activities and enhance assessment clarity and student engagement.
- Applied Universal Design for Learning (UDL) and ensured compliance with WCAG 2.1 AA, embedding accessibility-by-design across LMS content and multimedia resources.
- Created interactive and multimedia learning assets (H5P activities, videos, visual supports) to improve learner engagement and content clarity.
- Delivered staff workshops and consultations to strengthen digital teaching capability and effective LMS use.
- Managed learning design workflows using H5P, Turnitin, Asana, Smartsheet and Freshdesk, supporting timely and consistent delivery.
- Evaluated and refined learning materials based on academic feedback and student engagement data.
- **Key achievement:** Designed formative assessment activities that increased early-term student engagement by 20%, and contributed to course redesign initiatives integrating advanced eLearning tools to improve retention.

Multimedia Specialist/CAD Designer

Stubbify Pty Ltd | June 2018 - February 2022 | Melbourne, Australia

- Designed and produced high-quality digital media assets including promotional videos, animations and branded infographics using Adobe After Effects and Creative Suite.
- Led visual content development and digital storytelling strategies to enhance product communication and user engagement across web platforms.
- Created interactive visual content and web-ready graphics to communicate complex product features clearly and effectively.
- Conducted field product photography and advanced image retouching to maintain brand consistency and professional presentation standards.
- Designed automotive components using CAD software, contributing to prototyping and technical product development workflows.
- **Key Achievement:** Led the implementation of a 3D scanning and reverse engineering workflow that streamlined product design processes and improved production efficiency.
